SAFETY PRECAUTIONS

Please read the following safety guidelines before using the phone.

	Do not use the phone while you are driving. Pull over and stop your automobile to dial or listen to a phone call.
	Do not place magnetic storage media near your phone. Radiation from the phone may erase the information stored on them.
	Keep your phone and its accessories away from children. Do not allow children to use your phone without guidance. Small parts such as the SIM card, dust cap, lens ring and lens cap as well as the microSD card can be dismantled and swallowed by small children.
	Mobile phones can interfere with the functioning of medical devices such as hearing aids or pacemakers. Keep at least 20 cm (9 inches) between the phone and pacemaker. When using the mobile phone hold it to the ear which is furthest away from the pacemaker. For more information, consult your doctor.
	Permanent hearing loss may occur if you use earphones or headphones at high volume. You can adapt over time to a higher volume, which may sound normal but can be damaging to your hearing. Set your volume to a safe level. If you experience discomfort or buzzing in your ears, reduce the volume or discontinue use of your earphones or headphones.
	Use only original batteries and charging devices, otherwise you may risk serious damage to health and property. Battery can cause property damage, injury or burns if a conductive material, such as jewelry, keys or beaded chains touch exposed terminals. The material may complete an electrical circuit and become quite hot. Take extra care while handling any charged battery, particularly when placing it inside your pocket, purse or other container with metal objects. Do not dispose of batteries in fire as they may explode.

Notice:

- Do not dismantle the device or accessories otherwise, manufacturer is not liable to pay for damages as the device and accessories are not covered by warranty.
- Please back up your important data timely and keep them properly. The company is not liable for any failure to call or loss of data due to misoperation, poor signal or power cut, etc.
- All the screens in this manual are for reference only, and some contents actually displayed may depend on the presetting of the service provider or the network operator, or the SIM card. If any functions referred to in this manual are different from those of your phone, please follow your phone.
- Improper use will invalidate the guarantee! These safety instructions also apply to original accessories.
- Do not put your phone in a high-temperature place or use it in a place with flammable gas such as a petrol pumps.
- Do not touch the charger, power cable or socket with wet hands. This may cause an electric shock.
- Do not use the phone in an environment of extremely high or low temperature, or an environment of high humidity. It may cause malfunction of the phone, the charger and the battery. The phone using environment recommendation: temp 5-35°C, humidity 35%-85%, charging temp: 0°C-45°C.
- If you have difficulties installing the battery, do not force the installation. This may cause battery leakage, overheating, explosion or even fire.

Note: If your phone or any of its accessories do not function normally, please send them to the nearest authorized service facility. The qualified personnel will assist you, and if necessary, will arrange for service.

UNDERSTANDING YOUR PHONE

General Phone Information

Spice M-6460 is a multi SIM phone that encloses features, such as Java, 2 MP Camera, Video Player, Stereo Bluetooth, Audio Player, FM Radio etc. The phone supports T-flash card of up to 8 GB. 	Indicates that the Bluetooth is activated.
	Indicates that the current profile mode is the Headset mode.
	Indicates that the current alarm clock is set as activated.
	Indicates the current keypad-locked state.

GETTING STARTED

Please switch off your phone before inserting or removing the battery/SIM card or memory card.

Installing SIM Card and Battery

Your phone is provided with two SIM slots for two different SIM cards. The SIM card inserted in the slot1 is called Master SIM, and the other one in the slot2 is known as Slave SIM.

- Remove the back cover of the phone
- Hold the phone with the front facing downwards; pull the battery cover
- Insert the SIM cards in the phone.
- Attach the battery.
- Push the battery cover until it clicks into place.

Installing Memory Card

The phone supports T-Flash card, which is a multimedia memory card used to multiply the memory of the phone. The T-flash card is small and should be pulled out/installed carefully and prudently in order to avoid any kind of damage.

- Switch off your phone.
- Remove the battery cover.
- Open the external cover of the T-Flash card slot.
- Slide the T-Flash card into the slot.
- Attach the battery.
- Push the battery cover until it clicks into place.

Charging the Battery

The phone prompts a warning tone and message stating insufficient battery when the battery power of your phone is low.

Please follow the instructions mentioned below to charge your phone:

- Plug the connector of the charger into the jack of the phone.
- Plug the charger into a standard AC wall outlet.

Note:

When  is shown on the screen, it indicates that there is not enough power and you should now charge your phone. When charging is complete, the battery icon will stop flashing.

Charging.....  Fully Charged..... 

You must fully charge the battery before using the phone for the first time. It is recommended to charge the battery for four hours before using the phone for the first time.

If the phone is turned on during charging, you can still make or answer calls, but this will consume battery power, thus extending the charging time of the phone.

Switch On/Off the Phone

To turn on/off the phone, press and hold the End key.

If you have enabled the SIM Lock function then enter the PIN code (the 4 to 8 digits secret code of your SIM card). It is preconfigured and provided to you by your network operator or retailer. If you enter an incorrect PIN code 3 times in succession, your SIM card will be locked. To unlock it, you must obtain a code from your network operator.

Automatic Customer Registration

After 4 hours of usage a SMS from the phone will be sent automatically for the customer registration.

Note: standard SMS charges apply.

BASIC OPERATIONS

To Make Calls

If the icon  /  appears on the screen, then you can make or receive calls.

- Input the phone number (should affix the international/national/regional code or district code if necessary) and then press [M/S] in the standby mode.
- Press [M/S] to dial a phone number listed in the recent call log in the standby mode.
- Press and hold numeric keys [2]-[9] to dial the speed dial number assigned to the numeric keys.
- You can select a contact number from the phonebook and call the contact person.

Tip: The signal strength may influence the quality of connection.

To Dial International Number

The phone supports dialing the international emergency phone number, such as 112 and 911. With the phone, you can dial an emergency call in any country or region under the normal situation regardless of SIM card inserted (when the phone is located within the coverage of the GSM network). Input the emergency phone number and press [M/S] to dial.

In the idle mode, press * key twice to input “+”.

The phone will select the main network automatically if it is located within the coverage of the main network. The phone can use other network, called as roaming, if the phone is not located within the coverage of the main network when the network operator protocol permits.

You can dial or answer a call when the symbol of the network operator appears on the screen.

Answer/Reject an Incoming Call

- Press [M/S] to receive the incoming call. You can use the earphone to answer the call when the generic headset is inserted in the phone.
- Press [End Key] to reject an incoming call.

Options During a Call

Press <Options> to use the following functions during the call:

- **Sound Recorder:** record the current call.

- **Hold Single Call:** temporarily hold the current call.
- **End Single Call:** end the current call.
- **New Call:** call the opposite party to build a Call to Many.
- **Phonebook:** access the phonebook menu.
- **Message:** access the message menu.
- **DTMF:** on/off the DTMF function during the call.

MAIN MENU

Menu guides you to the various features, applications and services available in your phone. Press the Menu [**Left Soft Key**] in the idle mode to access the main menu. Press the Navigation Keys Up/Down/Left/Right to choose the desired menu and press Ok to enter the selected operation.

Phonebook	Messages	Call Log
Multimedia	Fun Spice	File Manager
Profiles	Settings	Organizer
Fun & Games	Extras	Internet

Security Settings:

Master/Slave SIM Security Settings

- **SIM Lock:**

You will be asked to input the PIN. It can be configured if the PIN is correct. If SIM card is set on, you will need to input the PIN every time you switch on the power. If you enter incorrect PIN three times, you will be asked to enter PUK. PUK is used to release and modify the locked PIN. If PUK is not provided or missed, please consult your network operator.

- **Fixed dial:**

You can define a list of numbers that can be dialed by Master SIM card. Numbers not included in this list cannot be dialed by Master SIM card.

Note: The Master SIM PIN2 code is required. Once the PIN2 code is entered when the phone is turned on, it is no longer required until next time the phone is turned on.

- **Barred dial**

It requires network support. If the SIM card supports this function, you may restrict the numbers for outgoing calls. If activated, your phone may not call the numbers in the Fixed dial list. The PIN2 code is required for this setting.

- **Change Password:**

You can change Master SIM/Slave SIM PIN, Master SIM/Slave SIM PIN2.

Phone Lock: You can lock or unlock the phone. Enter the password to activate or deactivate the phone lock. When the phone is locked, you will be asked to enter the phone password. 4-8 numbers can be used for the phone password. The default phone password is 1122.

Auto Keypad Lock: You can lock/unlock the phone keyboard and set the Key Lock Time to None, 5 sec, 30 sec, 1 min or 5 min.

Change Password: You can change phone password as per your desire.

Time and Date

- **Set Home City:** select the desired city.
- **Set Time / Date:** enter the current time and date.
- **Set Format:** select a time and a date format.

- **Update with Time Zone:** It can be set to On or Off.

Auto Power On / Off

You can set the time for auto power on /off. Do turn the status on before using that function, and then the time.

Note: Please disable the Schedule Power On function before you board an airplane.

Language

Select the desired language for the display text. M-6460 supports English language.

Pref. Input Methods

Select the desired input method to set as the default input method.

Greeting Text

You can type some welcome text and set the status to on, if your desire to view that text each time the phone is switched on.

Shortcuts

You can set shortcuts for those functions you often use. You can edit, delete/add and set the order of the shortcut list functions. In the shortcut list, press the up and down direction keys or the number keys to designate the function menus, select options to edit the selected shortcut.

Dedicated Key

You can assign short cut functions for the Navigation Keys/Up, Down, Left and Right Keys respectively. In the standby mode, press any one of them to access the allotted functions.

Auto Update of Date & Time

It can be set to on, if you want to automatically update the date & time, each time your phone gets switched on.

LCD Backlight

You can set the LCD backlight.

Restore Factory Settings

Access **Settings** to select **Restore Factory Settings**, and press OK. All settings can be restored to factory settings with this function. The default password is **1122**.

Call Settings

Master/Slave Call Settings

- **Call Waiting:** Activate, the network will notify you of a new incoming call while you have a call in progress (Net work Service).
- **Call Barring:** Activate, this network service allows you to restrict incoming calls from your phone. For details, contact your service provider.

Smart Divert

The smart divert function is provided to you for avoiding the missed calls. When you are in call on the first number, the incoming call from the second number will divert to first number if you have activated the smart divert function. The phone will remind you to check the smart divert status each time when you power on the phone. This function is based on service provider and smart divert function might not work on some provider if they have not such a service.

Further, you can also change other settings, such as blacklist, auto-redial, speed dial, auto quick end etc.

Network Settings

Please contact the network operator for the following network service.

Master/Slave SIM Network setup

Network Selection

You can choose Automatic or Manual to select the network (Auto is recommended). When you select Automatic, the phone will make the preferential selection according to the network where the SIM card belongs. When you select Manual, you are required to select the same network as the registered network with the network operator by SIM card for your use.

Preferences

Select the Preferred Networks. The default network is the network where the SIM card belongs. Select **Options** to perform the following operations:

- **Add From List:** Display all PLMN list.
- **New:** Create a new network and set the network priority.
- **Change Priority:** Reset the selected Network Priority.
- **Delete:** Delete the current preferred network.
